LONDON PROGRAMME:

OIL & GAS PROJECTS: LEGAL, COMMERCIAL, AND REGULATORY FRAMEWORKS IN PRACTICE

Oil and gas projects operate at the intersection of law, regulation, and complex commercial relationships. Whether upstream, midstream, or downstream, participants involved in energy projects must navigate contracts, government frameworks, risk allocation, and dispute mechanisms across multiple jurisdictions.

This intensive five-day programme provides a practical and internationally focused introduction to oil and gas law and practice. It examines the legal structures governing oil and gas operations, the contractual arrangements commonly used in the industry, and the regulatory and commercial risks faced by companies, governments, and investors.

The programme is designed to be accessible to participants from different legal systems and professional backgrounds. Using real-world examples, contract analysis, and case studies, it equips participants with the tools needed to understand oil and gas transactions, manage legal risk, and engage confidently with industry stakeholders in cross-border projects. The programme is suitable for finance professionals and accountants, lawyers, in-house counsel, commercial managers, engineers, government officials, compliance professionals, and anyone involved in oil and gas or energy-related projects.

Our Training Strategy

is based on personalised learning, where we aim to enable participants apply their learning and view petroleum operations with more depth the first day they are back at their work.

EMG Associates' Subject Expert:

Emre Usenmez is a legal expert in the natural resources sector and a petroleum economist. He has significant experience working with the staff of national ministries around the world, and with the oil and mining companies. He has chaired, moderated and spoke at numerous natural resources conferences focusing on legal and investment issues, and has given a TEDx talk on crude oil pricing. He has written a number of books, chapters and articles on oil and gas law and resource taxation.

He holds a PhD in Economics, Finance and Law, an MSc in Petroleum, Energy Economics and Finance, and an LLM in Oil and Gas Law from the University of Aberdeen. He also holds a BSc in Economics and a BA in Political Science from North Carolina State University.

Accreditation:

EMG Associates (UK) Limited is an accredited training provider of the Government of Dubai Legal Affairs Department (GLAD), under the Continuing Legal Professional Development (CLPD) Programme (Provider Code: BB18).

Eligible EMG programmes, where accredited by the Department, may qualify for CLPD points for registered Dubai legal consultants, subject to the applicable programme requirements.

Our programmes are also designed to support the continuing professional development and competence of legal professionals, including solicitors regulated by the Solicitors Regulation Authority (SRA) in England and Wales, in accordance with their individual professional development obligations.
